

The Intelligent Network

Fast forward digital

With over 20 years' experience in Enterprise Networking, we design, deliver, support, and manage a network that grows with you.

Empower your teams with intuitive secure experiences and scale operations with ease with next-generation IT Infrastructure.

The network of yesterday is no longer fit for purpose - static, un-fit for hybrid work, and not designed to support the growing decentralised world of cloud and SaaS based applications.

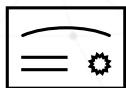

11%

The growing adoption of cloud services will increase the need for additional IT infrastructure by 11%
- IDC

70%

of organisations say that that it has become increasingly complex to manage a multivendor networking and security stack effectively - Gartner

What makes us great?

600+

vendor certifications across 50+ uniquely certified people

20+

Years as a Cisco Gold Partner with 4 Advanced Specialisations

500,000+

Users enabled with reliable and secure connectivity in the past two years

As award winning technology and service integrators, we work with industry leading partners to deliver intelligent networks. **Our enterprise solution architecture team ensure** your network is designed to support your business productivity and security needs. **Our consultative approach** means we ensure

you maximise your operational flexibility, whether on-premises, hybrid or fully cloud managed, allowing you to unlock the latest enterprise innovations. With our **technical guidance and support**, we work with your team to realise the benefit of a truly intelligent network.

Our Infrastructure and Enterprise Networking solutions are based around four key technology areas:

Wired Campus Network

Wireless Campus Network

Data Centre Networking

Secure Access Service Edge

We've really enjoyed working with Cisilion, they really understand the way a law firm works. They understand the way infrastructure works. My team get on extremely well with the technical teams at Cisilion, and all in all, it's been a tremendous success.

- **Jon Spencer, Infrastructure Manager**

Bird & Bird

Outcome & Benefits

The best user experience

with application and intent-based policy management and full-stack visibility from application to user.

Adaptive and self-healing

with automated provisioning, real-time analytics and performance monitoring, update management and patching.

A reliable, scalable, and application aware network

that connects your people, applications, data, offices, and users with application aware monitoring to maximise the user experience.

Native secure connectivity

and protection against cyber-attacks and insider risk.

Reduce cost and complexity

through vendor consolidation, and standardisation vendor point products improving security, compatibility, management, and support.

Our Clients

Refreshed campus infrastructure to deploy new Core & LAN/WLAN

3,500 access points

300 SDA switches

14,000 ports

Global LAN/WLAN refresh including logistics management

Provide managed service across all locations globally from Alaska to Yokohama

320+ access points

80 switches

95 sites globally

SD-WAN & Wireless refresh with managed service

Firewalls, access points, switches & connectivity deployed

260+ access points

260 switches

260 sites

Refresh LAN infrastructure in flagship store

Provide managed service across all locations globally

Modern architecture - stability of infrastructure

2,000 ports

5 floor retail store

About Cisilion

Connectivity and networking is the foundation and heritage of what Cisilion are and what our business is built on. With over 20 years as a Cisco Gold Partner, we advise, design, build, and manage Intelligent network infrastructure to support your business-critical applications for your private, public, or hybrid cloud environment.

Whether you are a commercial, public sector, or enterprise company, Cisilion is here to help you: from the datacentre to the workplace, Cisilion's services encompass building bespoke systems and solutions.
